Website: Victor Immanuel

I'm a full stack developer and a problem solver. I like to work on complex problems, generally curious about the web, Linux, cloud and AI. I also contribute to open source projects to improve my skills.

EXPERIENCE

Sensel Telematics, bangalore — *python developer*

January 2022 - August 2022

- Automated MySQL tasks for faster GPRS device testing
- Extracted and processed data from multiple sources for analysis
- Created web scraping scripts for efficient data collection
- Developed a comprehensive script for GPRS testing, including hardware control for real-world simulations

Zento Money, remote— *front end developer*

July 2023 - September 2023

- Designed the frontend for using figma.
- Built the site using React.js, tailwind css and framer motion for animations.

EDUCATION

Sea College of Engineering, Bangalore— *B.E in Aiml*

December 2021 - December 2025

PROJECTS

MensTribe— *an ecommerce site for men's clothing.*

- An Ecommerce site to buy men's clothing, built using react.js and tailwind css, Express.js and mongodb.
- Frontend is deployed on Vercel, the backend is running on digital ocean and using Cloudinary cdn for serving images.

QuickMeet — *Group Video chat application.*

- A real time video chat application similar to google meet to have group meetings.
- Frontend is built using React.js, Tailwind css, websockets and webrtc from scratch without any library or Api. Backend is built using Express and Postgresql.
